Methods

➔ Research on interconnections of groups multidisciplinary of staff professionals ➔

1. The nature of the organization is

- Structure
- Size
- History

2. Interdisciplinary communication and working relationships

- Team
- Culture
- Role

3. Different types of activities

Research methods used in interdisciplinary research are often different from those used in other research.

Interdisciplinary work is often complex, with many different groups and individuals involved. It is often a process of learning and discovery, with new insights emerging from the collaboration.

4. The different activities of work

- Research
- Teaching
- Learning
- Service

Interdisciplinary work is often a process of learning and discovery, with new insights emerging from the collaboration.

5. Interdisciplinary for policy development (interdisciplinary)

Interdisciplinary work is often a process of learning and discovery, with new insights emerging from the collaboration.

6. Impact on the different groups

Results

How do staff professionals in work interconnect? (Networks, Interdisciplinary, Transdisciplinary, Multidisciplinary, Interdisciplinary, Interdisciplinary)

The network is constantly evolving as new members join and old ones leave. The network is also dynamic because it is constantly evolving as new members join and old ones leave.
